# OUR VISION

To be the most trusted solution provider in the construction industry in the South Asian region.

# OUR MISSION

Providing total sustainable solutions for our valuable clients focussed entirely on their construction needs. St. Anthony's stands committed to provide total and complete solutions for residential, commercial, hotel, road and steel construction, renovation, face lift, lighting, and interior design requirements. Our team, comprising of consummate, qualified experts in architectural, structural, and other disciplines offer our clients a comprehensive service package tailor made to their individual requirements, while simultaneously ensuring the community in which we stand is strengthened and nourished and grows along with the company.

# ABOUT US

Building on the 45-year storied history and business acumen accumulated by the St. Anthony's Group of Business, a well reputed organization operating out of Kurunegala, in Sri Lanka's North Western Province, St. Anthony's Smart Solutions (Pvt). Ltd was incorporated with the aim of unifying the group's six horizontally diversified business lines that formed the pillars of this 45-year-old business, which were St. Anthony's Hardware Stores, St. Anthony's Timber Saw Mill, St. Anthony's Metal Crusher, St. Anthony's Cement Block Works, St. Anthony's Product Distribution Network, and St. Anthony's Construction works.

Thus, the group, which through its construction was in the process of constructing several government buildings and other R.D.A approved road projects, felt the immediate need to consolidate and transform the business into a fully fledged corporate entity, leading to the registration and incorporation of St. Anthony's Smart Solutions (Pvt). Ltd. on 22nd February 2023.

The company's 45-year history dates all the way back to 1942, and business proprietor the late Mr. K P. Joseph Perera, Grandfather of Present Managing Director of St. Anthony's Group of Business and co-Director of St. Anthony's Smart Solutions, Mr. Nalindra Shyamal Perera. What started in 1942 as a small retail consumer product store and tea shop, grew into a Bakery, and later into an urban hotel. Capitalising on the company's location withing Sri Lanka's famed coconut triangle, Mr. K. P. Joseph Perera, began the first of many diversifications by moving the business into the coconut plantation/agriculture industry, by producing and supplying copra to oil millers and copra exporters. This incarnation of the company known as Anthony Stores grew along with the copra industry until its founder's passing in 1978.

The company was then taken on by Mr. K.P. Joseph Perera's second son, Mr. Wilfred Peter Perera, who continued the diversification initiated by his late father, and steered the company through the emergence of the open economy that flourished in the country by diversifying into the building materials industry. The increased demand for building materials due to the migration of Sri Lankan's into Kurunegala led to an increase in demand for timber and metal for concrete work in construction. Never one to miss an opportunity Mr. Wilfred Peter Perera was quick to establish a Timber Saw Mill, sales outlet, and Metal Crusher supplying this booming industry.

Taking the helm to steer the company through the millennium Mr. Wilfred Peter Perera's son, Mr. Nalindra Shyamal Perera, initiated the company's foray into the Hardware industry by establishing St. Anthony's Hardware Stores in 2001. The continuous diversification of the group up to this point led to the construction of its own modern building and renovated premises to house the groups many companies including the new hardware store and warehouses for timber and metal.

The hardware store, which to date supplies every conceivable aspect of the construction industry including cement, all forms of steel products, paints, tiles, roofing material, floor tiles, bathroom fittings, PVC pipes, electrical items, door locks and hinges, metal, sand, bricks, cement blocks, timber, tools and power tools, and many more items.

By 2005, the company had grown to such an extent that the company began its own distribution network in 2005. Holding distributorships for Anton PVC Products, Ultratech Cement, Nipolac paint products, Harris Brushes, Lanwa Steel Products, Lanka Aluminium Products, ELTORO roofing products, Swisstech Aluminium Products, and Lanwa Cement Products. The company also invested in a full fleet of vehicles, and an experienced cadre of sales specialists to support its distribution network.

Coming on the heels of the expansion of the distribution network, the group also added its own cement block manufacturing plant and by 2017, opened Kurunegala's largest, and most well equipped Hardware store.

This continuous expansion culminated in the incorporation of St. Anthony's Smart Solutions Pvt Ltd. an all in one, end-to-end construction solutions provider with C4 ICTAD rating. Under which the company undertook and successfully completed several government building construction and R.D.A approved road projects.

# OUR COMPANY PILLARS

St. Anthony's Smart Solutions  
stands today built on the pillars of

ST. ANTHONY'S HARDWARE STORES

ST. ANTHONY'S TIMBER SAW MILL
